

Notice of Child Find Activity

SCHOOL DISTRICT OF БЕЛОIT NOTICE OF CHILD FIND ACTIVITY

The school district must locate, identify, and evaluate all children with disabilities, including children with disabilities attending private schools in the school district, regardless of the severity of their disabilities. The school district has a special education screening program to locate and screen all children with suspected disabilities who have not graduated from high school. Upon request the school district will screen a child who has not graduated high school to determine whether a special education referral is appropriate. A request may be made by contacting the Special Education Supervisor of the School District of Beloit by phone at 608 361-4099, or by mail: 1633 Keeler Ave., Beloit, WI 53511.

The district conducts developmental screening of preschool children throughout the school year. Each child's motor, communication, and social skills are observed at various play areas. The information is used to provide the parent with a profile of their child's current development and to provide suggestions for follow-up activities. Parents learn about community services available to them. The information from screening is also used to determine whether a child should be evaluated for a suspected disability. When school staff reasonably believe a child is a child with a disability, they refer the child for evaluation by a school district Individualized Education Program (IEP) team. Developmental screening will be available throughout the school year for children between the ages of 2 ½-4. For the 2008-09 school year there are AM appointments available on the following dates: September 17, December 3, February 4, and May 20. AM & PM appointments are available on October 22 and March 25. Please call 361-4023 to schedule a screening appointment for your child.

A physician, nurse, psychologist, social worker or administrator of a social agency who reasonably believes a child brought to him or her for services is a child with a disability has a legal duty to report the child to the school district in which the child resides. If the child attends a private school in another school district, the child should be reported to the school district where the child attends school. Before referring the child, the person making the referral must inform the child's parent that the referral will be made. The referral must be in writing and include the reason why the person believes the child is a child with a disability. Others who reasonably believe a child is a child with a disability may also refer the child. A referral for the School District of Beloit may be sent to the Special Education Supervisor at the school district address above.

The school district maintains pupil records, including information from screening and special education referral. All records directly related to a student and maintained by the school district are pupil records. They include records maintained in any way including, but not limited to, computer storage media, video and audiotape, film, microfilm, and microfiche. Records maintained for personal use by a teacher and not available to others and records available only to persons involved in the psychological treatment of a child are **not** pupil records.

The school district maintains several classes of pupil records.

- "Progress records" include grades, courses the child has taken, the child's attendance record, immunization records, required lead screening records, and records of school extra-curricular activities. Progress records must be maintained for at least five years after the child ceases to be enrolled.
- "Behavioral records" include such records as psychological tests, personality evaluations, records of conversations, written statements relating specifically to the pupil's behavior, tests relating specifically to achievement or measurement of ability, physical health records other than immunization and lead screening records, law enforcement officers' records, and other pupil records that are not "progress records." Law enforcement officers' records are maintained separately from other pupil records. Behavioral records may be maintained for no longer than one year after the child graduates or otherwise ceases to be enrolled, unless the parent specifies in writing that the records may be maintained for a longer period of time. The school district informs parents when pupil records are no longer needed to provide special education. At the request of the child's parents, the school district destroys the information that is no longer needed.
- "Directory data" includes the student's name, address, telephone listing, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, photographs, degrees and awards received, and the name of the school most recently previously attended by the student.
- "Pupil physical health records" include basic health information about a pupil, including the pupil's immunization records, an emergency medical card, a log of first aid and medicine administered to the pupil, an athletic permit card, a record concerning the pupil's ability to participate in an education program, any required lead screening records, the results of any routine screening test, such as for hearing, vision or scoliosis, and any follow-up to the test, and any other basic health information, as determined by the state superintendent. Any pupil record relating to a pupil's physical health that is not a pupil physical health record is treated as a patient health care record under sections 146.81 to 146.84, Wisconsin Statutes. Any pupil record concerning HIV testing is treated as provided under section 252.15, Wisconsin Statutes.
