Please share what is going well for your child(ren)/teen(s) in Distance Learning

- Teachers are communicating well.
- She gets to complete work in order she'd like. It gives her a sense of freedom.
- Love that my student can do classes in the am and the pm.
- Technology appears to be working.
- Like live lessons.
- Seeing classmates makes it easier for my child.
- The communication from Teachers is going well. The amount of work is just right.
- Being able to talk to the Teacher.
- My son is able to log in after I get home from work.
- I like that it is more structured than it was in the spring. It is more like being in school, just done at home.
- Ability to go back and watch live lessons.
- The length of class time and the balance of work are good. Excellent access to instructors.
- Live classroom experience is going well.
- Communication with Teacher. Good instruction on how to do things. Things are going smooth.
- My student feels confident with the technology and can navigate the apps.
- It is running very smoothly. I commend all of the teachers for their hard work and preparation and for making it so engaging. Communication has been top notch.
- The kids are really responding to seeing the teachers each day & interacting. Far superior to the end of last year. They are more engaged with their work and learning.
- They have enough time to meet their teachers and get work done.
- My daughter enjoys talking with her teacher and classmates during live sessions. The amount of work outside the live session is manageable and flexible.
- Seesaw app is easy to use! Different time slots for classes being offered is nice.
- Having the option to do live classes via google classroom or watching the videos in case we can't join a live class due to work schedules.
- She enjoys the interaction, she is able to access the Google Classroom easily. Teachers have been very helpful to her.
- The materials kindergarten DLI are using are really good! My son is voluntarily sharing things he's learning like different habitats and protecting the environment, etc.
- LIVE teaching from the HS teacher! Not just videos from the internet but time with the ACTUAL teacher.

What (if any) suggestions do you have to improve our Distance Learning model?

- More flexibility and paper work (instead of on iPads) for older students who have issues focusing or getting into live classes due to other responsibilities during the day.
- I am at a loss right now as to how to make this experience better.
- Provide more practice, especially in math.
- Have teachers issue out a "to-do" list each week so students know what they should be getting done each day as it is very easy to fall behind and get lost while doing social distance school.
- While the online platforms for distance learning have been consolidated somewhat compared to the last school year, it can still be difficult to keep track of communication from the school.
- It seems like we are doing a great job so far as a community.
- Just keep improving on what you are doing this year.
- It is hard for the younger kids to sit for a live session longer than 20-30 minutes.
- I think a little more face to face time (zoom) would be useful but for the most part is working ok.
- If there was a way to know your if your child attended the live class that would be helpful to parents who are working. Right now, we are taking them at their word.
- Nothing I can think of right now.
- More homework.
- I am really concerned about the teachers. There is SO much on them right now during Distance Learning. We need to make sure their social emotional wellbeing is taken care of in order for them to teach our children!!
- Longer classes for learning.
- A way for working single parents to keep up with all the work.
- I like the structure this time as opposed to the spring. The workload seems much more reasonable, although my kids need quite a bit of support during this unconventional learning experience.
- A parent support class to help my child with their homework and a iPad class on how to navigate and use their iPad and school apps.
- It's just difficult with two kids. Not anything anyone can do about it!
- Get back to school.
- None. This year virtual learning is going great. I can't express how thankful I am.
- More ways to assist children that need help with homework.
- More actual worksheets rather than so many online assignments using apps. Kids don't get enough time writing.
- iPad that hold their charge for more than four hours.
- Keep the 4-day week. Seems to work just fine. Or go 3 days. The extra day or two can be used for college/tech ed, work study, etc.
